Stellar Repair for Outlook - Technician

User Guide for Version 11.0

1. About Stellar Repair for Outlook - Technician

Stellar Repair for Outlook - Technician offers a complete solution to repair damaged Microsoft Outlook Personal Storage (PST) files.

The software repairs corrupt PST files and restores all its content such as e-mails, attachments, contacts, calendars, tasks, journals and also repair accidentally deleted or lost Mailbox items. This minimizes the loss from the PST corruption. **Stellar Repair for Outlook - Technician** scans and extracts data from a damaged PST file, repairs it and then saves it as a new usable PST file. To view repaired items, you need to import the new PST file into MS Outlook.

Stellar Repair for Outlook - Technician also ensures recovery of accidentally deleted e-mails that you have emptied from the deleted items folder. After recovering the PST file, the software shows its original content. All folders from the original PST file get displayed along with their content in a three-pane structure.

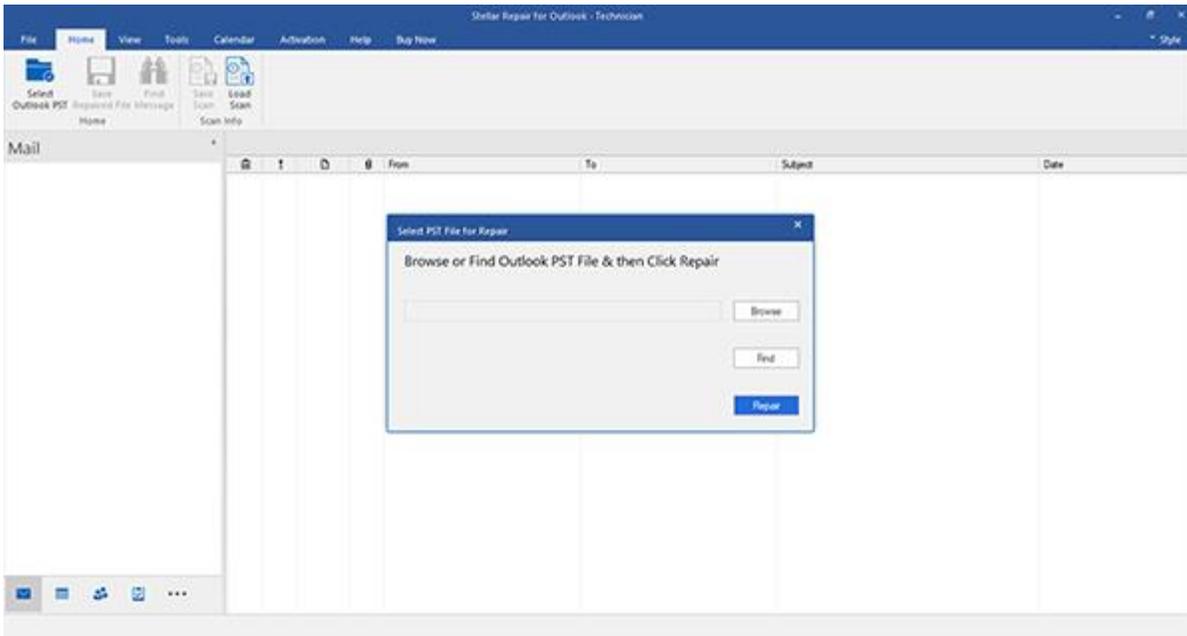

Key features:

- **Supported Output Formats:** Repair and export PST files to Microsoft Office 365, Existing Outlook Profile or save in PST, MSG, EML, RTF, PDF, HTML, DBX and MBOX format.
- **Encrypted Files Support** - Supports repair of encrypted PST files.
- **Recover Deleted E-mails** - Supports recovery of deleted items. The application also provides preview of the deleted items marked with red color.
- **Preview Option:** Provides preview of mails and items such as - Attachments, Calendar, Contacts, Tasks, Notes, and Journal.
- **Compress and Split PST files** - Option to compress or split the files and save in PST file format.
- **Quick Save Option** - Right-click and save individual mails in MSG, EML, RTF, HTML, and PDF from preview section.
- **Selective Repair** - Provides option to only save selected mailbox folders as per requirement.
- **Find Option** - Provides search option to find emails faster.
- **Resume Function** - Option to save scanned information to resume the process at a later stage.
- **Source PST File Support** - Repairs corrupt MS Outlook 98, 2000, 2002, 2003, 2007, 2010, 2013, 2016 and 2019 PST files.
- **MS Office Support** - Supports MS Office 365, 2019, 2016, 2013, 2010 and 2007.
- **Operating System** - Compatible with Windows 10, Windows 8.1, Windows 8 and Windows 7.

4. Frequently Asked Questions (FAQs)

1. What does Stellar Repair for Outlook - Technician do?

The software repairs corrupt PST files and restores all its data such as e-mails, attachments, contacts, calendars, notes, tasks and journals. **Stellar Repair for Outlook - Technician** provides the preview all scanned data and gives options to export data to Existing Outlook Profile, Office365 or save in PST, MSG, EML, RTF, HTML, PDF, DBX and MBOX format.

2. I have forgotten the path of my PST file. Can this application search it for me?

Yes, the application can look for PST file on your system and find it for you easily. There is a dedicated Find option in the application through which you can locate a particular PST and run a repair on it.

3. I had run the demo and can see preview correctly in PST Repair software window. Do I need to rescan the corrupted file?

Not at all, through the Demo version, you can preview repaired file after scanning. This special feature has been included in the tool to make sure that you can first preview the repair results on your damaged PST file and only after you are satisfied with the results, you should decide on making the purchase and saving your repaired files.

4. I want to recover permanently deleted emails from my Outlook. Will your PST Repair software help?

Yes, the software scans and recover your permanently deleted emails from Outlook. You can preview the deleted items before saving as well. These deleted items will be shown in red color while previewing.

5. Can we exclude the deleted items from the recovered mailbox while saving?

Yes, select the checkbox "**Do not recover Deleted Items**" to exclude the deleted items from the repaired file.

6. How much time will the Outlook PST Repair software take to repair a PST file?

The scanning time depends upon the corruption level, size of PST file and also on the number of mailbox items in the mailbox. If the process is running, that means that software is still scanning the corrupted file and you have to wait for this scanning process to complete. Once scanning gets completed, you will be able to save the repaired file at the desired location.

7. I got an error "Invalid PST file" while scanning. What could be the reason?

There could be the following reasons for this error message:

- The PST file is severely corrupted or is not in a repairable state.
- The PST file is not a valid file.

- The file could not be accessed.

8. I have repaired my corrupt PST file. But I'm unable to find my contacts. How can I find them?

You can easily locate and access your contacts by following these simple steps:

- Import your repaired PST file into **MS Outlook**.
- Open **MS Outlook**.
- Then press "**Ctrl+Shift+F**".
- "**Find Message / Advanced Find**" window will open. Please select "**Contacts**" under "**Look For**" tab.
- Click on the "**Browse**" button and select the imported PST file.
- Then, click "**Find Now**."
- Now you will be able to see all the contacts that you were able to preview with software's Demo Version. You may select the entire contacts listed and drag it to your original contacts list, so that you may use it further.

9. Can I repair a corrupt PST file of size more than 2 GB?

Absolutely yes, this tool is capable of repairing PST files that are more than 2 GB. Please download the demo version and scan your PST file. You can preview all emails and other mailbox items which can get recovered through this tool.

10. I want to analyze the repair process. Can I see the log report at a later stage?

Certainly. The application gives you an option to save and view log reports at any point in time. To view and save log reports follow the following steps:

- On **View** ribbon, select '**Log Report**.'
- In **Stellar Repair for Outlook - Technician** window, click '**Save Log**' and save it at the desired location for viewing at any time. To know more refer to Log Report.

11. Should Microsoft Outlook be installed in my system while I repair my PST file and it works well with which version?

Microsoft Outlook is not required while repairing and previewing PST file, but must be installed in your system to use the saving options. The software is compatible with the following versions:

Microsoft Outlook: Office 365 / 2019 / 2016 / 2013 / 2010 / 2007.

12. What does the compact feature of Stellar Repair for Outlook - Technician do?

As the name suggests, the compact feature of **Stellar Repair for Outlook - Technician** application helps in reducing the size of PST files and attachments on MS Exchange Server. It has various options for attachments of emails that can get selected for compaction and extraction.

13. Why do I need to compact PST files?

MS Outlook stores all data like e-mails, personal data, calendar, tasks, etc. in a PST file. Eventually, the file becomes oversized. Such PST files are prone to corruption, so you need to compact them. **Stellar Repair for Outlook - Technician** has a compaction feature using which you can compact the PST file.

14. Can I extract all my attachments in a separate folder while compacting the PST file?

Yes, you can extract the attachments in a separate folder. To do this, choose the **Extract attachments and leave shortcuts in emails** in **Compacting Option** before starting the compact process. The attachments are left as shortcut links in the mails.

15. Can I restore the links to attachments to the PST file?

Yes, you can restore the links by using the Relink Attachment Folder. You need to relink the attachment folder when you move it after using Extract and save attachments to a folder (No interlinking is lost) or Extract, compress and save attachments to a folder (No interlinking is lost) option.

16. I want to run the software on select folders of the PST file. Can I choose some selected mailbox folders in the application?

Yes, you can apply extraction and compaction settings on only the selected folders of the PST file.

17. I repaired my PST file, but I'm unable to open my Outlook after repair. How can I solve this problem?

That can happen, but we are sure if you follow the steps below you can easily resolve this:

- Open **Windows -> Control Panel**.
- Double-click **Mail**. In **Mail Setup** window, select **E-mail Accounts** to configure your email account.
- After configuring, close the window and open **MS Outlook**.
- To view the repaired PST file, you can either select **Open -> Outlook Data File** from **File ribbon** or, Import the PST file in MS Outlook.

18. In how many ways can I split a PST file using Stellar Repair for Outlook - Technician software?

There are three ways in which you can split a PST file using **Stellar Repair for Outlook - Technician** software. They are as follows:

- **By Mail Id** - You can select e-mail ids under **Mail Ids** scroll box to split the PST file according to e-mail ids. Alternatively, you can also use the **Select All/Unselect All** buttons to select/unselect all the email ids. All selected email ids will be stored in the repaired PST file, and no change is made to the source PST file. To know more refer to Filter by Mail ID
- **By Date Range** - You can select **Split By Date Range** checkbox and then select either of the two options:
 - Select **the last** radio option if you want to split the PST file according to months. All e-mails that are sent and received in the specified months will get stored in the repaired PST file.
 - Select **between** radio option if you want to split the PST file according to a specific period. All e-mails from the specific period will get stored in the repaired PST file. Select the start and end date from the list boxes. To know more refer to Filter by Date Range
- **By Size** - You can select Split by Size checkbox and then split the PST file to a maximum size of 50 GB. Either enter the digit or using upward or downward arrow set the number as per your requirement. With this option, you will get multiple split PST files. To know more refer to Split by Size

***Note:** In case you select all the three split option checkboxes (**By Mail Id**, **By Date Range** and **By Size**), the application will queue them, and will split PST files using all the three methods.*

19. I have a PST file exceeding 50 GB of size, does the new PST file generated will have same size as that of source PST file?

For large files, **Stellar Repair for Outlook - Technician** automatically splits the new PST file in small sizes. The size of the split files will depend on the version of Outlook installed on your computer:

If you have Outlook 2007 installed, the new PST will be splitted at approximately 18 GB size.

If you have Outlook 2010 or above installed, the new PST will be splitted at approximately 45 GB to 48 GB of size.

20. When I enter the Mail ID and Password to export data to Office365, the system shows an error. What can I do?

The application shows error because of the following reasons:

- If the credentials (Admin ID and Password) you have entered are incorrect.
- The Admin credentials you have entered do not have required permissions to export data to Office365.
- There is a connection failure with internet. In that case, check your network connection and try again. If your internet is working, check your firewall and anti-virus software settings for any blockage.
- There is a server issue because of which server is not able to create a connection with Office 365. Check if you are able to connect to Office 365 outside the **Stellar Repair for Outlook - Technician** application and try again.

21. After saving my repaired mailbox in PST format. How to view and access the mailbox items?

After you have saved the repaired mailbox in PST format, you can import the PST file in MS Outlook. See [Importing PST file in MS Outlook](#), to know how to import PST file.

After the conversion is complete, the software provides a preview of the converted OST file. See Preview Converted OST File, for more details.

3.2. Preview Converted OST File

Stellar Converter for OST - Technician shows the preview after the OST file is converted. The preview of the mailbox data is available in a three-pane structure containing: Left pane, Middle pane and Right pane, which are explained below in detail:

- The left pane provides the navigation tree, displaying the files with its mailboxes, folders and sub-folders. Select the desired mailbox/folder/sub-folder from this pane.
- The middle pane provides a list of mailbox items, in a tabular format, of the selected mailbox/folder/sub-folder. The pane contains the following columns:
 - **Deleted icon:** Shows the deleted emails of the selected mailbox, in red color.
 - **Importance icon:** Signifies that the particular mail is sent with high importance.
 - **Type:** Shows the type of mail item it has.
 - **Attachments:** Shows an attachment icon if the particular mail item contains an attachment.
 - **From:** Shows the email address of the sender.
 - **To:** Shows the email address of the receiver.

- **Subject:** Shows the email subject.
- **Date:** Shows the date and time when the email was sent.

Tip: You can change the order of the above-given columns as per your requirement. Click and hold on the column name and drag the column to the desired location to change it.

- The right pane provides the preview of the mail item that you select from the middle pane. It shows the following information:
 - **Subject:** Shows the subject of the email.
 - **From:** Shows the email address of the sender.
 - **To:** Shows the email address of the receiver.
 - **Attachments:** Shows the attachments of the selected mailbox item.
 - **Body:** Shows the preview of the body of the selected mail item.

Note: To switch between vertical and horizontal reading panes, click **Switch Reading Pane** icon in **View** ribbon.

Additional Options:

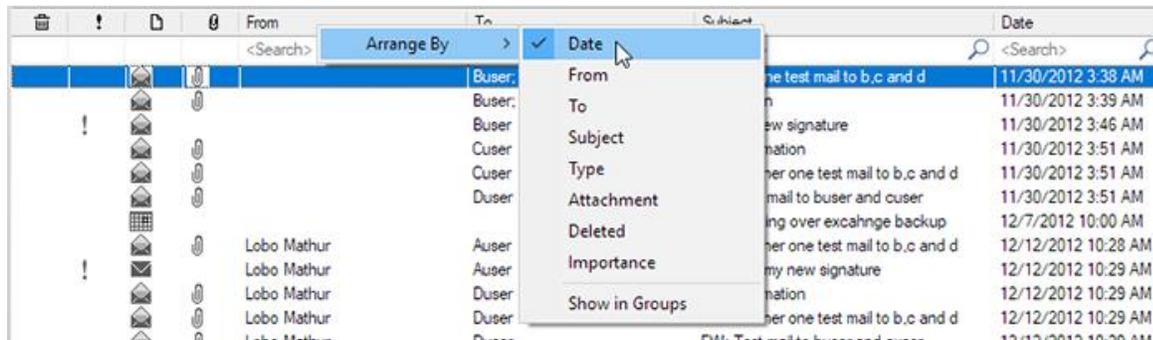

- **Quick search:** The software provides quick search options for Mails. In the middle pane below the table headings, type the keywords in the search bar of a particular column. The columns that support quick search are From, To, Subject, and Date.

4. Frequently Asked Questions (FAQs)

1. What does Stellar Converter for OST - Technician do?

The **Stellar Converter for OST - Technician** converts OST file and provides options to export data to Live Exchange Server, Existing Outlook Profile and Office 365. Also, provides options to save data in PST, MSG, EML, RTF, HTML, PDF, DBX and MBOX formats.

2. What is an OST file?

OST (Offline Storage Table) file represents the user's mailbox data in offline mode. An Exchange account uses an offline Outlook data file i.e. OST file, to store a synchronized copy of your Exchange mailbox information on your local computer or the local machine. Therefore, an OST file is automatically created when you configure the Exchange Server account on Microsoft Outlook.

3. I am not aware of the OST file location. How do I select the file for conversion to PST?

Stellar Converter for OST - Technician can help you find OST file on your system. There is a dedicated Find option in the software through which you can locate a particular OST file and convert it.

4. I had run the demo and can see preview correctly in convert OST window. Do I need to rescan the file?

Not at all, through the Demo version, you can preview the converted file after scanning. This special feature has been included in the tool to make sure that you can first preview the conversion results of your OST file and only when you are satisfied with the results, you should decide to make the purchase and save your converted files.

5. I want to recover permanently deleted emails from my OST file. Will Stellar Converter for OST - Technician help?

Yes, the software scans and recover your permanently deleted emails from OST file. Before saving the deleted items you can preview them as well. These deleted items will be shown in red color while previewing.

6. Can we exclude the deleted items from the converted mailbox while saving?

Yes, select the checkbox "**Do not convert Deleted Items**" to exclude the deleted items from the converted file.

7. How much time will Stellar Converter for OST - Technician software takes to convert an OST file?

The conversion time depends upon the size of the OST file and also on the number of mailbox items in the mailbox.

8. I got an error "Invalid OST file" while scanning. What could be the reason?

There could be the following reasons for this error message:

- The OST file is severely corrupted or not in a state to be converted.
- The OST file is not valid.
- The file could not be accessed.

9. I have converted my old OST file. But I'm unable to find my contacts. How can I find them?

You can easily locate and access your contacts by following these simple steps:

- Import your new PST file into **MS Outlook**.
- Open **MS Outlook**.
- Then press "**Ctrl+Shift+F**".
- "**Find Message / Advanced Find**" window will open. Please select "**Contacts**" under "**Look For**" tab.
- Click on the "**Browse**" button and select the imported PST file.
- Then, click "**Find Now.**"
- Now you will be able to see all the contacts that you were able to preview with the software's demo version.
You may select the entire contacts listed and drag it to your original contacts list, so that you may use it further.

10. Can I convert an OST file of size more than 2 GB?

Absolutely yes, this tool is capable of converting OST files having a size greater than 2 GB. Please download the demo version and scan your OST file. You can preview all emails and other mailbox items that are converted into this tool.

11. I want to analyze the conversion process. Can I see the log report at a later stage?

Certainly. The software provides you an option to save and view log reports at any point in time. To view and save log reports just follow the following steps:

- On **View Ribbon**, select '**View Log Report.**'
- On **Stellar Converter for OST - Technician** window, click '**Save Log**' and save it at the desired location to view it any time. To know more refer to Log Report.

12. Should Microsoft Outlook be installed in my system while I convert my OST file and with which version it works well?

Microsoft Outlook is not required while converting and previewing OST file, but it must be installed in your system to use save options. The software is compatible with the following versions:

Microsoft Outlook: Office 365 / 2019 / 2016 / 2013 / 2010 / 2007.

13. What does the compact feature of Stellar Converter for OST - Technician do?

As the name suggests, the compact feature of **Stellar Converter for OST - Technician** helps to reduce the size of converted PST files and attachments on MS Exchange Server. It has various options for attachments of emails that are selected for compaction and extraction.

14. Why do I need to compact the PST files?

MS Outlook stores all data such as emails, personal data, calendar, tasks, etc. in a PST file. Eventually, the file becomes oversized. Such PST files are prone to corruption, so you need to compact them. **Stellar Converter for OST - Technician**, has a compaction feature that helps to compact the PST file.

15. Can I extract all my attachments in a separate folder while compacting the PST file?

Yes, you can extract the attachments in a separate folder. There are two options to do it Extract and save attachments to a folder (No interlinking is lost) or **Extract, compress and save attachments to a folder (No interlinking is lost)** option. The attachments remain as shortcut links in the emails.

16. I want to extract and compact the software on select folders of the PST file. Can I choose some selected mailbox folders in the software?

Yes, you can apply extraction and compaction settings on only the selected folders of the PST file.

17. Can I restore the links of attachments to the PST file?

Yes, you can restore the links by using the **Relink Attachment Folder**. You need to relink the attachment folder when you move it after using Extract and save attachments to a folder (No interlinking is lost) or **Extract, compress and save attachments to a folder (No interlinking is lost)** option.

18. I converted my OST file, but I'm unable to open my Outlook file after the conversion. How can I solve this problem?

To resolve this problem, follow the below-mentioned steps:

- Open Windows -> **Control Panel**.
- Double-click **Mail**. In the **Mail Setup** window, select **E-mail Accounts** to configure your email account.
- After configuring, close the window and open **MS Outlook**.
- To view the newly created PST file, you can either select **Open -> Outlook Data File** from **File** ribbon or, Import the PST file in MS Outlook.

19. In how many ways can I split a PST file using Stellar Converter for OST - Technician?

There are three ways to split a PST file using **Stellar Converter for OST - Technician**. They are as follows:

- **By Mail ID** - You can select email ids under **Mail IDs** scroll box to split the PST file according to email ids. Alternatively, you can also use the **Select All / Unselect All** buttons to select/unselect all the email ids. All selected email ids will be stored in the new PST file, and no change is required to be done to the source file. To know more refer to **Filter by Mail ID**
- **By Date Range** - You can select **Split By Date Range** checkbox and then select either of the two options:
 - Select **in the last** radio option if you want to split the PST file according to months. All emails that are sent and received in the specified months will be stored in the new PST file
 - Select **between** radio option if you want to split the PST file according to a specific period. All emails from the specific period will be stored in the newly created PST file. Select the start and end date from the list boxes. To know more refer to **Filter by Date Range**
- **By Size** - You can select **Split by Size** checkbox and then split the PST file to a maximum size of 50 GB. Either enter the digit or using an upward or downward arrow set the number as per your requirement. With this option, you will get multiple split PST files. To know more refer to **Split by Size**

Note: In case you select all the three split option checkboxes (**By Mail Id, By Date Range, and By Size**), the software will queue them and will split PST files using all the three methods.

20. I have an OST file exceeding 50 GB of size, does the new PST file generated will have the same size as that of source OST file?

For large files, **Stellar Converter for OST - Technician** automatically splits the new PST file in small sizes. The size of the split files depends on the version of Outlook installed on your computer:

If you have Outlook 2007 installed, the new PST will be splitted at approximately 18 GB size.

If you have Outlook 2010 or above installed, the new PST will be splitted at approximately 45 GB to 48 GB of size.

21. When I enter the Mail ID and Password to export data to Office 365, the system shows an error. What can I do?

The software shows an error because of the following reasons:

- If the credentials (Admin ID and Password) you have entered are incorrect.
- The Admin credentials you have entered do not have required permissions to export data to Office 365.
- There is a connection failure with the internet. In that case, check your network connection and try again. If your internet is working, check your firewall and anti-virus software settings for any blockage.
- There is a server issue because of which the server is unable to create a connection with Office 365. Check if you can connect to Office 365 outside the **Stellar Converter for OST - Technician** software and try again.

22. After saving my converted mailbox in PST format. How to view and access the mailbox items?

After you have saved the converted mailbox in PST format, you can import the PST file in MS Outlook. See Importing PST file in MS Outlook, to know how to import the PST file.

23. Can I convert multiple OST files into PST files?

Yes, you can convert multiple OST files into PST files using **Batch Conversion** from **Home** ribbon. This feature is not available in the demo version.

4. Frequently Asked Questions (FAQs)

1. Where is the converted file saved if I select a file from the select batch option?

The converted file is saved automatically at the source file location with the same name as that of the file along with the log report in case you do not change the location of the converted file.

2. Where is my batch file saved if I don't change its path?

The batch file is saved in the setup folder located under Program files as **OST2PSTBatch_date_time_time/size.dat**.

3. If I select multiple files having the same name from different locations saved at a common destination path. Then how would I recognize my converted file?

The converted file is saved to the destination path with the same name as that of the file along with the log report in case all the files have the same name is saved with format filename_0, filename_1, and so on.

4. I have forgotten the path of my OST file. Can I search for the OST file using the software?

Of course, you can search for OST files in a specific drive or folder. Click **Find OST File** option in the software to locate the OST file.

5. How much time Stellar Converter for OST - Technician software takes to convert an OST file to PST mailbox?

The conversion time depends upon the size of the OST file and also on the number of mailbox items in the mailbox.

6. I want to analyze the conversion process. Can I see the log report at a later stage?

Certainly. The software gives you an option to save and view log reports at any point in time. To view and save log reports follow the following steps:

- On **View** ribbon, select '**Log Report.**'
- In **Stellar Converter for OST - Technician** window, click '**Save Log**' and save it at the desired location for viewing at any time. To know more refer to Log Report.

7. What is an OST file?

OST (Offline Storage Table) file represents the user's mailbox data in offline mode. An Exchange account uses an offline Outlook data file i.e. OST file, to store a synchronized copy of your Exchange mailbox information on your

local computer or the local machine. Therefore, an OST file is automatically created when you configure the Exchange Server account on Microsoft Outlook.

8. What is a batch file?

A batch file keeps all the settings and inputs of the user to convert and split multiple files. A batch file contains all the information required to convert and split OST files such as some files selected, their location path, destination path of the output file, start date, end date, processed status or any other detail as required by the process.

It can be used as an input file once it is created. It can also be used to review the number of files processed or to get information about selected files.

A batch file is created by the software itself before the initiation of the process to use the batch file as input to convert and split process. When a batch file is created by the software, then it has a file extension .DAT.

The default location of the batch file will be in the installation folder of the software.

9. I have an OST file exceeding 50 GB of size, does the new PST file generated will have the same size as that of source OST file?

For large files, **Stellar Converter for OST - Technician** automatically splits the new PST file in small sizes. The size of the split files will depend on the version of Outlook installed on your computer:

- If you have Outlook 2007 installed, the new PST will be splitted at approximately 18 GB size.

If you have Outlook 2010 or above installed, the new PST will be splitted at approximately 45 GB to 48 GB of size.

3. Working with the Software

3.1. Add PST Files

3.2. Find PST Files

3.3. Splitting Options

3.4. Create and Manage Batch Files

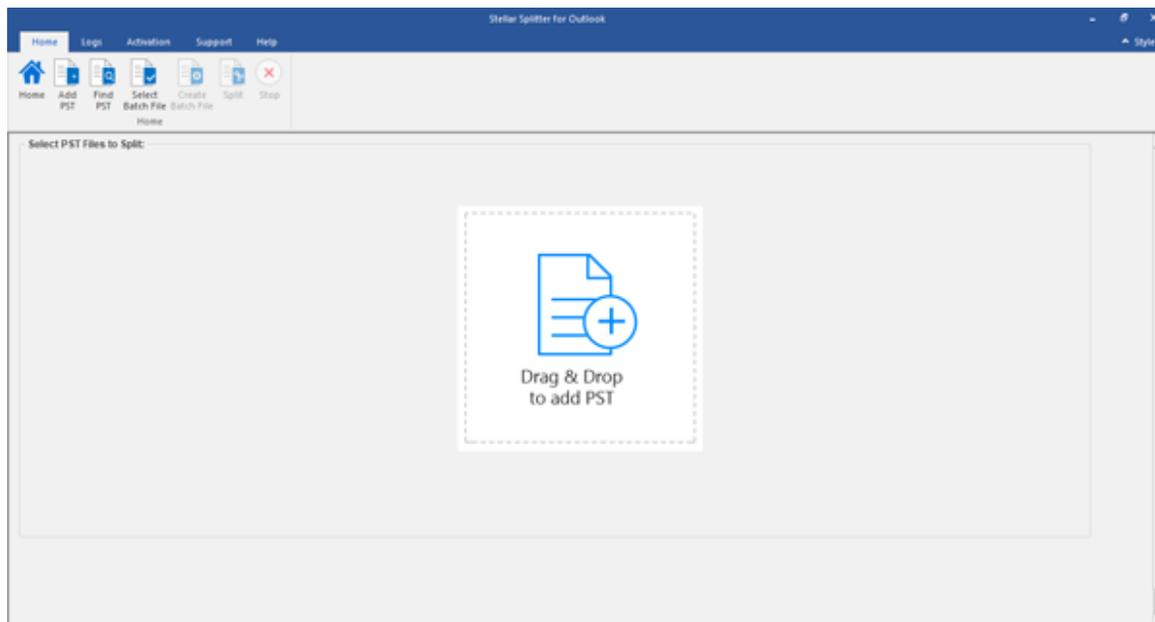

3.5. View and Save Log Report

3.1. Add PST Files

To start the split process, you need to add files to the **Stellar Splitter for Outlook** software. You can add a single file or multiple files to the software.

To add PST files:

- Run **Stellar Splitter for Outlook**.
- From the **Home** menu, click **Add PST** icon. *Open* dialog box will appear. Browse and select the desired file and then click **Open**.

Or,

- Click **Drag & Drop to add PST** button on the main interface. An *Open* dialog appears, choose the location from where you want to select the file. Click **Open** button.

Or,

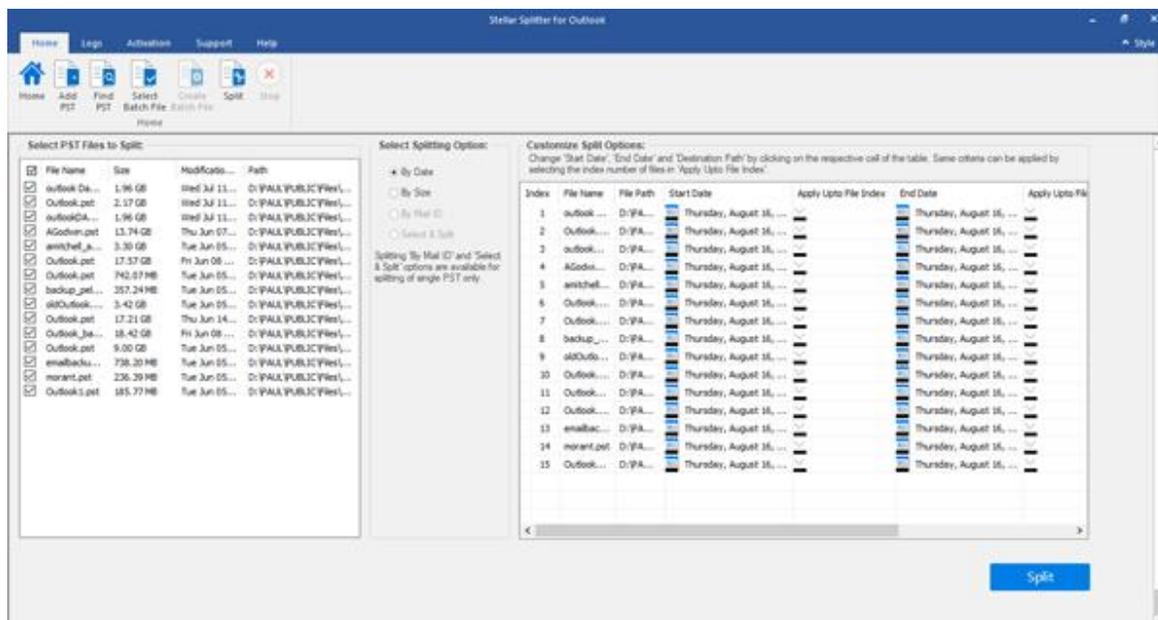

- Open Windows Explorer to Drag & Drop the desired files to the application.

3.2. Find PST Files

Stellar Splitter for Outlook allows you to find PST files in your computer's hard drive, in case you don't know their location. With the help of 'Find PST' option, you can find PST files in any folder, subfolder or an entire volume in your system.

To Find a PST File:

- Run **Stellar Splitter for Outlook** application.
- From the **Home** ribbon, click **Find PST**.
- In **Browse for Folder** dialog box, select the drive or folder you want to search for PST files. Click **OK**.
- After the search is finished, a list of PST files found in the selected drive or folder is shown on the left side of the screen.

- Select files you wish to split from this list.
- From the middle pane of the screen, specify the criteria based on which you want to split your PST.

3.3. Splitting Options

Stellar Splitter for Outlook provides you different features to split your large PST file into smaller PSTs. Each option is described below, in detail. Every time a split operation is performed, a new PST file is created without altering the contents and structure of original PST file. Thus **Stellar Splitter for Outlook** never causes any damage to your invaluable original PST file.

3.3.1. Split Single PST By Date Criteria

3.3.2. Split Single PST By Size

3.3.3. Split Single PST By Mail ID

3.3.4. Split Single PST By Selecting Folders

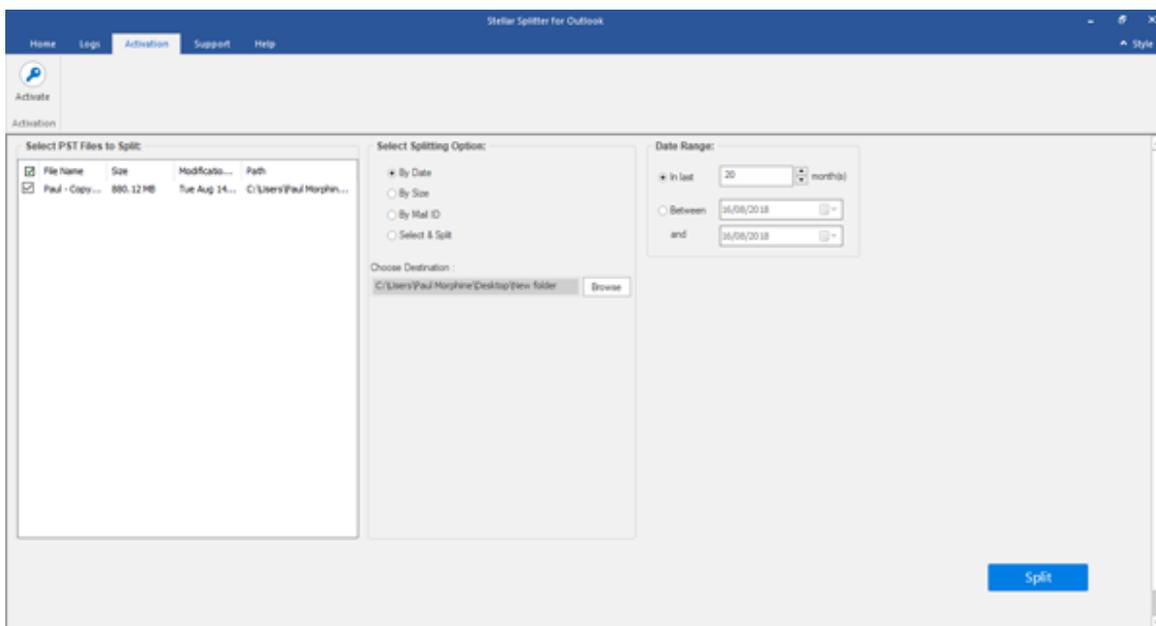

3.3.5. Split Multiple PST Files By Date

3.3.6. Split Multiple PST Files By Size

3.3.1. Split Single PST By Date Criteria

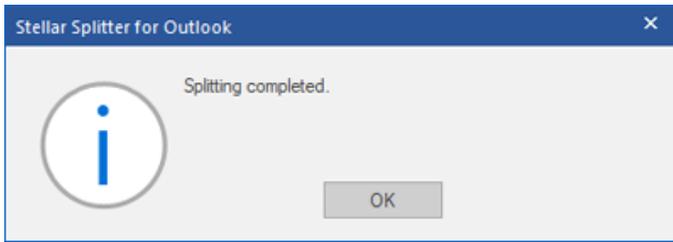

To split single PST file by date criteria, please follow the procedure as described below:

1. Start Stellar Splitter for Outlook application.
2. Add PST File which you want to split.
3. Stellar Splitter for Outlook application window shows a three-pane window. The PST File you added will be listed in the left-pane.
4. From '**Select Splitting Option**' section in the middle pane of the screen, select **By Date** option.
5. Click **Browse** and select the location where you want to save the PST File. Click **OK**.
6. From '**Date Range**' section in the right pane of the screen,
 - o Select **In last** radio option if you want to split the PST file according to months. All e-mails that are send and received in the specified months will be stored in the split PST file.
 - o Select **Between** radio option if you want to split the PST file according to a specific time period. All e-mails from the specific time period will be stored in the split PST file. Select the start and end date from the list boxes.
7. User can specify to create a new PST file of all mails sent or received in last 'x' number of months or mails sent or received in a specified date range.

8. Onwards this click on '**Split**' to start the process.

9. 'Splitting completed' message is displayed after the process is completed successfully. Click **OK**. The PST file will be saved at your specified location.

10. Once the process is complete, you need to specify the path where a log can be saved for the split operation. This will help you to check the operation activities performed on your PST file.

3.3.2. Split Single PST By Size

Split By Size option allows you to create small PST files of your bigger PST by specifying the size of each PST file. The size of split PST file can be 5GB, 10GB, 20GB, 30GB or 50GB.

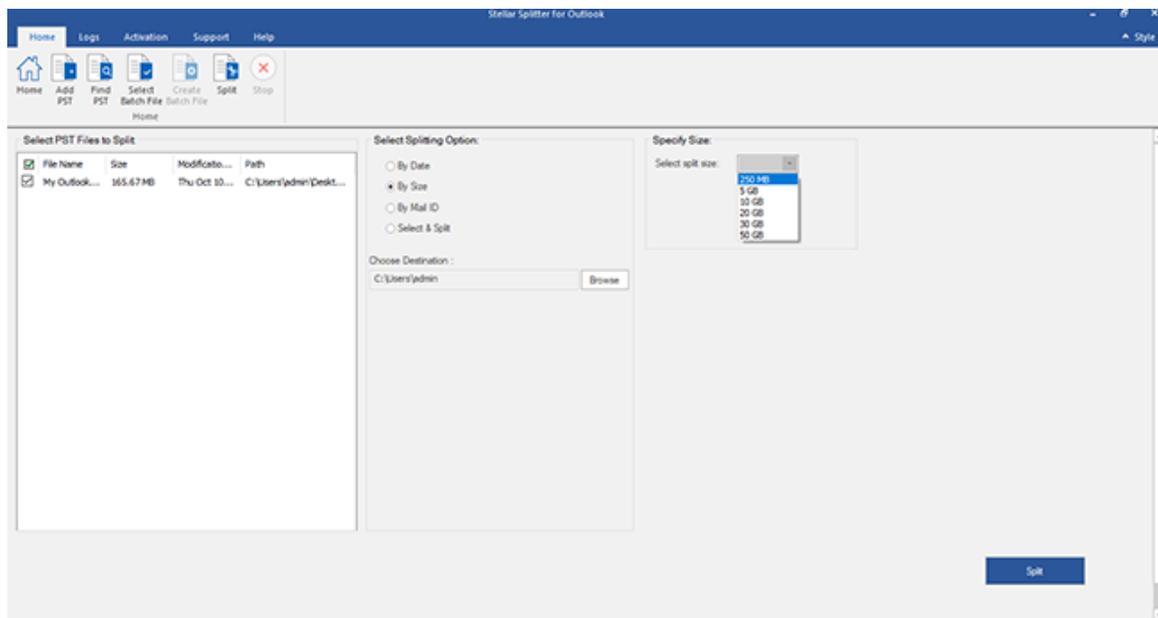

To split single PST file by size, please follow the procedure as described below:

1. Start **Stellar Splitter for Outlook** application.
2. Add PST File which you want to split.
3. Stellar Splitter for Outlook application window shows a three-pane window. The PST File you added will be listed in the left-pane.
4. From '**Select Splitting Option**' section in the middle pane of the screen, select **By Size** option.
5. Click **Browse** and select the location where you want to save the PST File. Click **OK**.
6. From '**Specify Size**' section in the right pane of the screen, specify size of each PST slice that you want to create from larger PST. Size range can be 5GB, 10GB, 20GB, 30GB or 50GB.

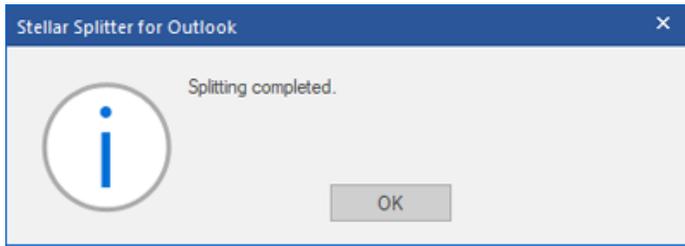

Note: For large files, **Stellar Splitter for Outlook** automatically splits the new PST file in small sizes. The size of the split files will depend on the version of Outlook installed on your computer:

If you have Outlook 2007 installed, the new PST will be split at approximately 18 GB size.

If you have Outlook 2010 or above installed, the new PST will be split at approximately 45 GB to 48 GB of size.

7. Onwards this click on '**Split**' to start the process.
8. 'Splitting completed' message is displayed after the process is completed successfully. Click **OK**. The PST file will be saved at your specified location.

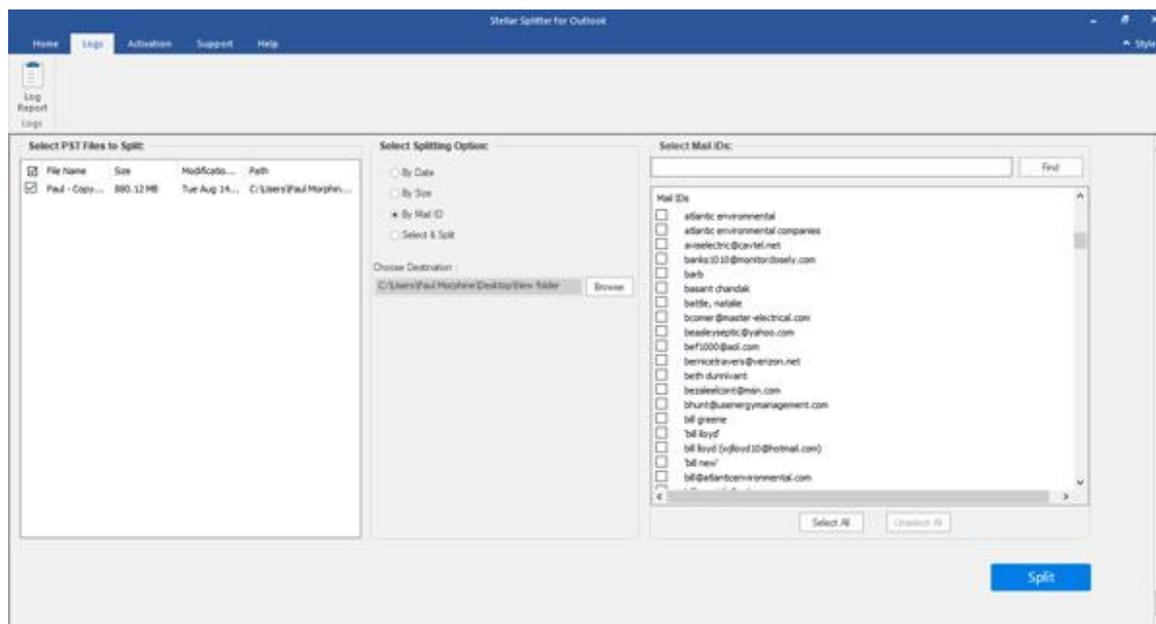

9. Once the process is complete, you need to specify the path where a log can be saved for the split operation. This will help you to check the operation activities performed on your PST file.

Note: In demo version of the software, the size of the split PST file will not be more than 250 MB.

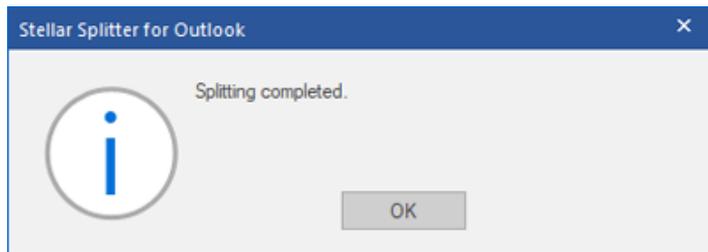

3.3.3. Split Single PST By Mail ID

To split single PST file by mail id, please follow the procedure as described below:

- Onwards this click on **'Split'** to start the process.
- 'Splitting completed' message is displayed after the process is completed successfully. Click **OK**. The PST file will be saved at your specified location.

3.4. Create and Manage Batch Files

Stellar Splitter for Outlook provides you an option to create a batch file. A batch file contains all the information required to split PST files such as number of files selected, their location path, destination path of output file, start date, end date, processed status or any other detail as required by the process. It can be used as input file once it has been created either by user or by the application. It can also be used to review the number of files processed or to get information about selected files.

A batch file is created either by the application itself before the initiation of process or by the user to use the batch file as input to split process. When a batch file is created by the application then it has a file extension of **.DAT** and user created batch file is saved with a file extension of **.TXT**

To create a batch file for time based splitting

Follow the steps mentioned below to create a batch file for time based split operation:

1. Open Notepad.exe
2. Create a structure as given below:
 3. First file source path;First file output destination path;First file start date;First file end date;Second file source path;Second file output destination path;Second file start date;Second file end date;
4. Date must be in MM/DD/YYYY format.
5. Example: C:\PST1\Test1.pst;E:\Split_Destination1\;03/23/2000;09/05/2009;D:\PST File2\Test2.pst;D:\Split Destination2\;11/02/2001;05/28/2008;

Note: There should be no space between parameters, even if they are for different files as shown above. Parameters are separated by semi colons.

To create a batch file for size based splitting

Follow the steps mentioned below to create a batch file for size based split operation:

1. Open Notepad.exe
2. Create a structure as given below:

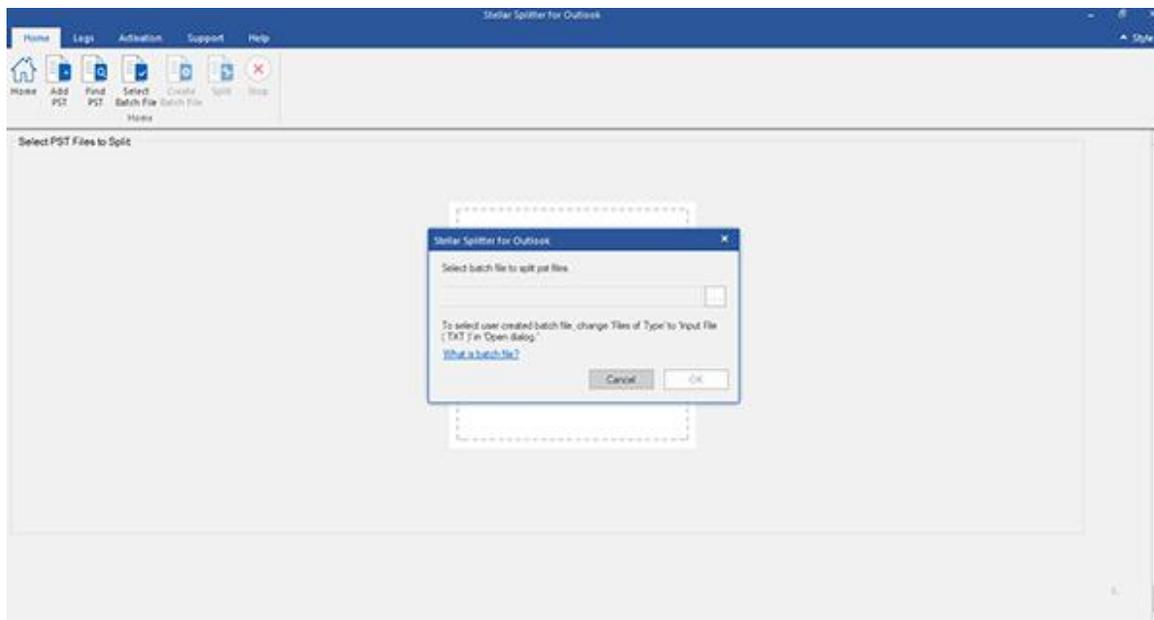

First file source path;First file output destination path;First file split size;Second file source path;Second file output destination path;Second file split size;

3. Size must be in GB and no fraction in size is accepted. Size should be greater than 5GB and can have a value of 10GB, 20GB, 30GB or 50GB.
4. Example: C:\PST1\Test1.pst;E:\Split_Destination1\;2;D:\PST2\Test2.pst;D:\Split_Destination2\;7;

Note: There should be no space between parameters, even if they are for different files as shown above. Parameters are separated by semi colons.

To use already created batch file to split PST files

Already created batch file can be used to split multiple PST files that are either saved at different locations or are stored in a folder.

A batch file created for time based splitting can be used to split:

- Multiple PST files at different locations.

- Multiple PST files with multiple date ranges.
- Multiple PST files located in a folder.

A batch file created for size based splitting can be used to split:

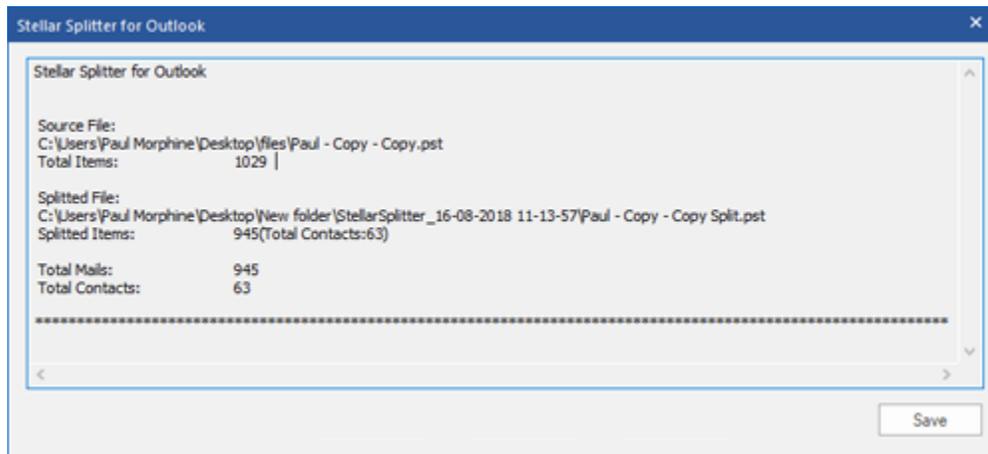

- Multiple PST files at different locations.
- Multiple PST files located in a folder.

3.5. View and Save Log Report

With **Stellar Splitter for Outlook**, you can save the Log Report to analyze the split process at a later stage.

To save log report:

1. From **Logs** Menu, select **Log Report**.
2. A log window appears on the screen displaying the details of the split files.

3. Click **Save** button.
4. In **Save Log** dialog box, click **Browse** and select the location where you want to save the log report. Click **OK**.

Stellar Compactor for Outlook

User Guide for Version 7.0

1. Overview

Microsoft Outlook data is stored in personal folders file that ends with PST extension. Almost all the data, one stores in various MS Outlook folders, goes in to PST file linked with that profile. Outlook PST file, also known as Outlook Data File contains all items like e-mails, alerts, to-do lists, tasks, journals, notes, contacts. Protecting this data is crucial since it contains confidential, personal and financial information.

One of the major threats to Outlook PST file is its becoming oversized. PST files can be compressed to recover from this situation. Stellar Compactor for Outlook is designed to compact the size of PST files using powerful algorithms. The application performs deep scan of the PST file and compacts all the e-mails, calendar, contacts, tasks, and notes.

Key Features

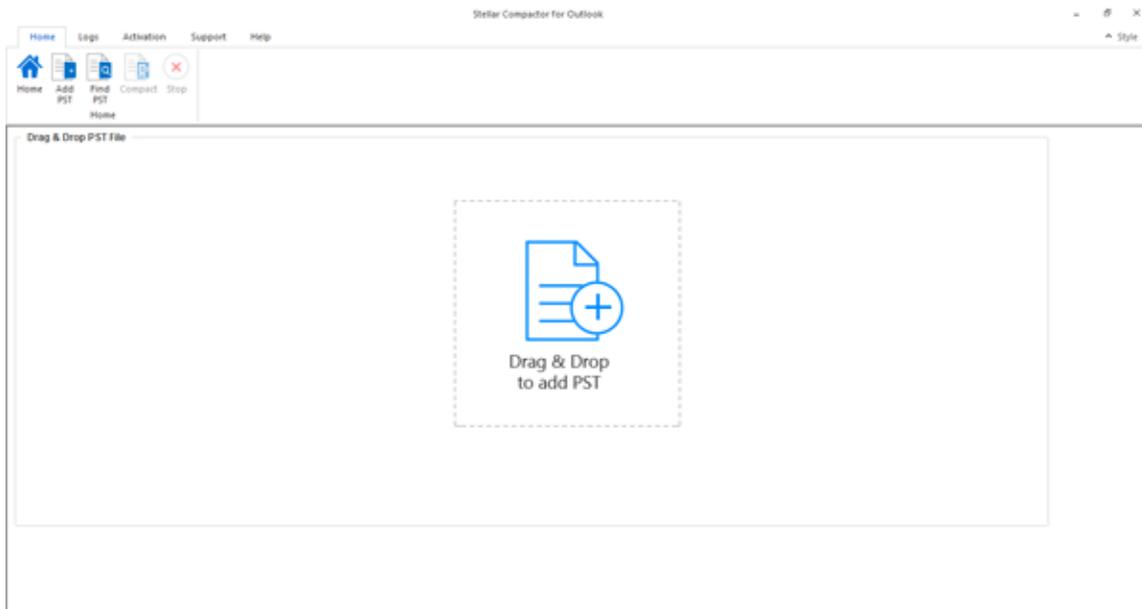

- **Stellar Compactor for Outlook** is a 100% result-oriented tool to compact Outlook PST files.
- Software can extract the attachments and saves them in a new folder. Interlinking of the compacted PST file and attachments is preserved.
- Software extracts the attachments, compresses them in zipped file (ZIP) and saves them in a new folder. Interlinking of compacted PST file and attachments is preserved.
- Software can compact PST file without saving the attachments. This option will remove all attachments in the compacted PST file.
- Application can compact any PST file of MS Outlook 2019/ 2016/ 2013/ 2010/ 2007/ 2003/ 2002/ 2000.
- Application can empty Deleted Items folder while performing any compaction option.
- Application can empty Junk E-mail folder while performing any compaction option.

3. Features

Stellar Compactor for Outlook software is a powerful application to compress Microsoft outlook PST file. It provides four options for compacting PST files. Compaction of PST file can be done with or without separating attachments. Extracted attachments can be saved into a new folder either in original form or in compressed zip files. The application also gives options to delete contents of the 'Deleted Items' and Junk E-mail' folder in compacted Outlook PST file.

3.1. Compact Options

3.2. Advance Compact Options

3.1. Compact Options

E-mails in the MS Outlook PST file may have attachments in them. **Stellar Compactor for Outlook** gives four options for attachments that can be set while compacting a PST file. **Stellar Compactor for Outlook** allows to extract attachments from PST file and save them in a new folder either in original form or in compressed zip format. Options to remove all attachments while compacting PST file are also available. Four compact options available in the application are:

- Compress all attachments in new PST file
- Extract and save attachments to a folder (no interlinking is lost)
- Extract, compress and save attachments to a folder (no interlinking is lost)
- Remove all the attachments in new PST file

3.2. Advance Compact Options

When e-mails are deleted in MS Outlook, the space occupied by them remains allocated. This space can grow up to large size in short span of time. Over sized PST files are more likely to corrupt than normal sized files. So, unused space must be released. **Stellar Compactor for Outlook** application helps in removing unused space while compacting PST file. It also provides an option to remove deleted items and junk mails from their respective folders. Three advanced compact options available in the application are as follows:

- Remove Unused Space.
- Empty 'Deleted Items' folder.
- Empty 'Junk E-mail' folder.

4. How To...

4.1. Select PST file

4.2. Find PST files

4.3. Compact PST file

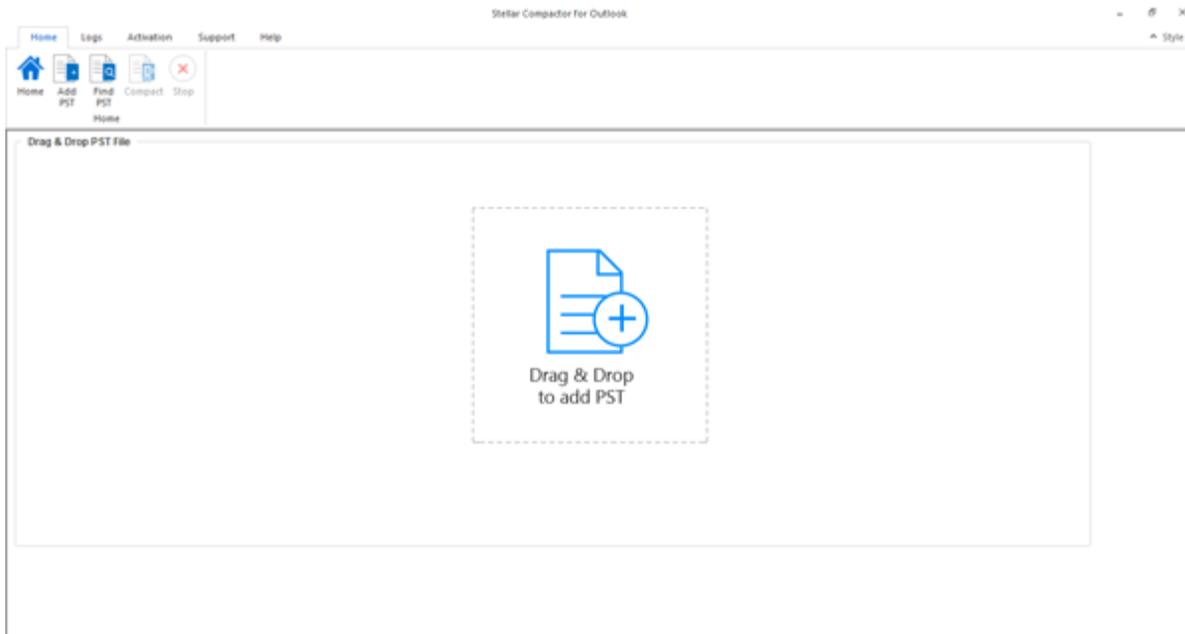

4.4. Import PST files

4.5. Relink Attachment Folder

4. **'Relinking process completed'** message will be displayed on completion of process.

5. FAQs

1. What is Stellar Compactor for Outlook?

Stellar Compactor for Outlook is a software application that helps in reducing the size of MS Outlook PST files. It has various options for attachments of mails that can be selected for compaction. Unused space taken by deleted items can also be wiped by help of this application.

2. What is need to compact PST files?

MS Outlook stores all the data i.e. e-mails, personal data, calendar, tasks, etc. in a PST file. Eventually this file becomes over sized with time. Also, when we delete items in any of the folders of a PST file, space allocated to them is kept intact. Hence, there is no difference to size. Oversized PST files are prone to corrupt so they must be compacted when ever oversized. **Stellar Compactor for Outlook** compacts size and deletes unused space of PST files.

3. Can I extract all my attachments in a separate folder while compacting the PST file?

Yes, you can extract the attachments in a separate folder. To do this, choose the Extract and save attachments to a folder option in the **Compact Option** before starting the compact process. Interlinking of the attachments and PST file is preserved after compaction.

4. Can I get a PST file after compaction that has only the messages and no attachments?

Yes, You can get it by choosing the **Remove all the attachments in new PST file** option in the **Compact Option** before starting the compact process. The compacted PST file will have only messages and other items but no attachments.

5. I do not want any item in my Deleted items folder after compacting the PST file? How to do this?

You can empty Deleted Items folder in the compacted PST file. To do this, select the **Empty 'Deleted Items' folder** option in the **Advance Compact Option** before starting the compact process.

6. Can I delete all the junk items in my compacted PST file?

Yes, you can empty the Junk Items folder in PST file. Choose **Empty 'Junk E-mail' folder** option in **Advance Compact Option** to do this.

7. How to import the compacted PST file in MS Outlook?

Import the PST file in MS Outlook application to view it. To do this,

1. Open Microsoft Outlook. On the File menu, select Import and Export.
2. In the Import and Export Wizard, select Import from another program or file, click Next.
3. In the Import a File box, select Personal Folder File (PST), click Next.
4. Click Browse to locate the PST file that needs to be imported. In the options box, select an appropriate option. Click Next.
5. In the Import Personal Folders dialog box, select the folders that should be imported in Microsoft Outlook. Click Finish.

3. What is need to find duplicate mails?

MS Outlook stores all the mail items in a PST file. Eventually this file becomes over sized with time. Oversized PST files are prone to corrupt so they must be compacted when ever oversized. **Stellar Deduplicator for Outlook** finds duplicates and prevents the files from over sizing.

4. Can I extract all my duplicate mails in a separate folder?

Yes, you can move all mails in a separate folder. To do this, choose the **Copy to folder...** in **Select Action**.

5. I don't remember the mail items I deleted last time. Is there any way to know it?

Yes, Stellar Deduplicator for Outlook gives an option to save the log report of all its activities as text. Open the log report and view the items deleted last time.

6. I want to run the software on selected folders of PST files. Can I choose some selected mailbox folders in the application?

Yes, you can set the application to find duplicates from selected folders. To do this, select the folders in the **Select folders** dialog box and select the folders in which you want the application to find the duplicate mails.

7. I have got mails from different people with same attachment. How to delete these mails with same attachment?

To find mails with same attachments, follow these steps:

- Launch **Stellar Deduplicator for Outlook**.
- Select Folder(s) to scan for duplicates
- Click **Next** button
- Select **Time Span**. This section lets you define the time range within which the software will check for duplicates in email items.
- Select **Any time** option in drop down list to include all the mail items
- Or, select the appropriate time span from the list (Last day, Last 2 days, Last 5 days, Last 10 days, Last 20 days, Last 30 days, Last 50 days, Last 75 days, Last 100 days, Last year)
- Select **Attachment Files** in the **Comparison Criteria** section.
- Select **Action** that will be executed on the found duplicate items.
- Click **Run Process** button to start removing duplicates from Outlook.

Stellar and its suppliers and licensors make NO WARRANTIES OR REPRESENTATIONS (express or implied, whether by statute, common law, custom, usage, or otherwise) as to any matter including without limitation to quality, availability, performance or functionality of the licensed software or any related Stellar websites or services; quality or accuracy of any information obtained from or available through use of the licensed software or related Stellar websites or services; any representation or warranty that the use of the licensed software or any related Stellar websites or services will be uninterrupted or always available (whether due to internet failure or otherwise), error-free, free of viruses or other harmful components or operate on or with any particular hardware, platform or software; non-infringement of third-party rights, merchantability, integration, satisfactory quality, or fitness for any particular purpose, except for, and only to the extent, that a warranty may not be excluded or limited by applicable law in licensee's jurisdiction.

9. DATA PROTECTION.

You understand that by using the Licensed Software, you consent and agree to the collection and use of certain information about you and your use of the Licensed Software in accordance with Stellar's Privacy Policy. You further consent and agree that Stellar may collect, use, transmit, process and maintain information related to your Account, and any devices or computers registered thereunder, for purposes of providing the Licensed Software, and any features therein, to you. Information collected by Stellar when you use the Licensed Software may also include technical or diagnostic information related to your use that may be used by Stellar to support, improve and enhance Stellar's products and services. For more information please read our full privacy policy at "<https://www.stellarinfo.com>", on the section Privacy Policy. You further understand and agree that this information may be transferred to the United States, India and/or other countries for storage, processing and use by Stellar, its affiliates, and/or their service providers. You hereby agree and consent to Stellar's and its partners' and licensors' collection, use, transmission, processing and maintenance of such location and account data to provide and improve such features or services.

10. INTERNET CONNECTIVITY & PRIVACY.

10.1 Automatic Connections to the Internet. The Software may cause Customer's Computer, without notice, to automatically connect to the Internet and to communicate with Stellar website or Stellar domain for purposes such as license validation and providing Customer with additional information, features, or functionality. Unless otherwise specified in Sections 10.2 through 10.5, the following provisions apply to all automatic Internet connections by the Software:

10.1.1 Whenever the Software makes an Internet connection and communicates with a Stellar website, whether automatically or due to explicit user request, the Privacy Policy shall apply. Stellar Privacy Policy allows tracking of website visits and it addresses in detail the topic of tracking and use of cookies, web beacons, and similar devices.

10.1.2 Whenever the Software connects to Stellar over the Internet, certain Customer information is collected and transmitted by the Software to Stellar pursuant to the Stellar Online Privacy Policy available at <https://www.stellarinfo.com/> under Privacy Policy section.

10.1.3 If Customer accesses Stellar Online Service or activates or registers the Software, then additional information such as Customer's ID, user name, and password may be transmitted to and stored by Stellar pursuant to the Privacy Policy and additional terms of use related to such Stellar Online Service.

10.1.4 Stellar, unless barred under applicable law, may (a) send Customer transactional messages to facilitate the Stellar Online Service or the activation or registration of the Software or Stellar Online Service, or (b) deliver in-product marketing to provide information about the Software and other Stellar products and Services using information including but not limited to platform version, version of the Software, license status, and language.

10.2 **Updating.** The Software may cause Customer's Computer, without additional notice, to automatically connect to the Internet (intermittently or on a regular basis) to (a) check for Updates that are available for download to and installation on the Computer and (b) notify Stellar of the results of installation attempts.

10.3 Activation. The Software may require Customer to (a) obtain Stellar Software Activation Key, (b) activate or reactivate the Software, (c) register the software, or (d) validate the Ownership. Such requirement may cause Customer's Computer to connect to the Internet without notice on install, on launch, and on a regular basis thereafter. Once connected, the Software will collect and transmit information to Stellar. Software or Customer may also receive information from Stellar related to Customer's license, subscription, or Ownership. Stellar may use such information to detect or prevent fraudulent or unauthorized use not in accordance with a valid license, subscription, or Ownership. Failure to activate or register the Software, validate the subscription or Ownership, or a determination by Stellar of fraudulent or unauthorized use of the Software may result in reduced functionality, inoperability of the Software, or a termination or suspension of the subscription or Ownership.

10.4 Use of Online Services. The Software may cause Customer's Computer, without additional notice and on an intermittent or regular basis, to automatically connect to the Internet to facilitate Customer's access to content and services that are provided by Stellar or third parties. In addition, the Software may, without additional notice, automatically connect to the Internet to update downloadable materials from these online services so as to provide immediate availability of these services even when Customer is offline.

10.5 Digital Certificates. The Software uses digital certificates to help Customer identify downloaded files (e.g., applications and/or content) and the publishers of those files. For example, Stellar uses digital certificates to help Customer identify the publisher of Stellar applications. Customer's Computer may connect to the Internet at the time of validation of a digital certificate.

11. LIMITATION OF LIABILITY

In no event shall Stellar or its suppliers be liable for any special, incidental, indirect, or consequential damages whatsoever (including, without limitation, damages for loss of business profits, business interruption, loss of business information, or any other pecuniary loss) arising out of the use of or inability to use the software product or the provision of or failure to provide support services, even if Stellar has been advised of the possibility of such damages. In any case, Stellar's entire liability under any provision shall be limited to the amount actually paid by you for the software product or a sum of US Dollars Five whichever is higher.

12. TERMINATION

If Customer breaches this EULA, and fails to cure any breach within 30 calendar days after request from Stellar, Stellar may terminate this EULA, whereupon all rights granted to Customer shall immediately cease including but not limited to the license granted to the customer to use the software which shall also stand revoked. Furthermore, upon termination, Customer shall return to Stellar all copies of the Licensed Software, or verify in writing that all copies of the Licensed Software have been destroyed and failure of the customer to do so would entitle Stellar to sue for relief in equity and damages.

13. JURISDICTION AND LAW

13.1 This EULA is subject to, and will be governed by and construed in accordance with the substantive laws applicable to the state of Delhi (India). Courts at Delhi, India alone shall have the jurisdiction to entertain any dispute arising out of the terms and conditions of this EULA and you consent to such jurisdiction of the courts at Delhi, India.

13.2 This EULA will not be governed by the conflict of law rules of any jurisdiction, or the United Nations Convention on Contracts for the International Sale of Goods, the application of which is expressly excluded.

14. GENERAL

14.1 This License is the complete statement of the agreement between the parties on the subject matter and merges and supersedes all other or prior understandings, purchase orders, agreements and arrangements.

14.2 The exclusions of warranties and liability limitations shall survive the termination of this EULA, howsoever caused; but this survival shall not imply or create any continued right to use the Licensed Software after termination of this EULA.

14.3 Licensee shall not ship, transfer, or export Licensed Software into any country or use Licensed Software in any manner prohibited by the applicable export control laws, notably where applicable, the United States Export Administration Act, restrictions, or regulations (collectively the 'Export Laws'.) All rights to use the Licensed Software are granted on condition that Licensee complies with the Export Laws, and all such rights are forfeited if Licensee fails to comply with the Export Laws.

14.4 Stellar reserves all rights not expressly granted to Licensee by this EULA All rights are reserved under the copyright laws of India and/or of other countries, to Stellar Information Technology Pvt Ltd, having its registered office at 205, Skipper Corner, 88, Nehru Place, New Delhi, India 110019.

14.5 There are no third party beneficiaries of any promises, obligations or representations made by Stellar herein.

14.6 Any waiver by Stellar of any violation of this License by you shall not constitute nor contribute to a waiver by Stellar of any other or future violation of the same provision or any other provision of this License.

14.7 This EULA constitutes the entire agreement between you and Stellar and it supersedes all prior or contemporaneous representations, discussions, undertakings, communications, agreements, arrangements, advertisements, and understandings regulating the Licensed Software.
